

CHOOSE ONE:

- A) PROTECT THE NEW EQUIPMENT
- B) REPLACE THE NEW EQUIPMENT

A STOP Security Plate is the most cost-effective prevention, anti-theft, recovery, and inventory tracking product available. Which is good, because whether your equipment is lost or stolen at school, on the bus, playing field or anywhere else, replacing equipment is an expense no one wants to face.

EFFECTIVE DETERRENCE

The value of your hi-tech equipment also makes it a target. STOP Security Plates significantly reduce the percentage of theft by clearly marking your equipment as an obvious liability for any would-be thief. Our patented system integrates a highly visible security plate. Under that, there's a **chemically bonded tattoo stating "Stolen Property"** that even a determined thief can't remove and would find virtually impossible to explain to a potential purchaser.

STOP Security Plates retain your property's value while it's under your control, but if ever stolen, the prominently displayed plate and the tattoo beneath completely remove any value on the resale market.

RECOVERY

The value of STOP Security Plates goes beyond deterrence. If your equipment is just misplaced, STOP Security Plates are marked with a unique registration number that **dramatically increases the incidence of recovery** by providing an easy way for the finder to do the right thing.

If someone finds your lost STOP plated equipment where it shouldn't be, they simply contact STOP by phone on our 24-hour hotline or connect with us online. STOP will make the necessary arrangements to get your machine back to you quickly.

ASSET MANAGEMENT

When using STOP Security Plates, every protected device can be registered without additional charge in STOP Monitor, our **web-based Asset Tracking database**, making inventory management easier than ever. For in-house management, STOP Monitor lets you keep track of who has what, when it's due back, and reminds you when it's overdue.
